**ZEN Homoeopathy - leading intractable diseases to be cured and enhancing spirituality**

**Torako Yui Ph.D.Hom**  
Honourable chairperson of Japanese Homoeopathic Medical Association

**Address:** Yato 3 bldg., 2 – 2 – 3 Tamagawadai, Setagaya-ku, Tokyo 158 0096 JAPAN

**Correspondence:** [office@jphma.org](mailto:office@jphma.org)

## ABSTRACT:

In this article, the author describes an outline of how she developed the ZEN Homoeopathy and advocates karmic and spiritual issues behind diseases and the solution along with pathological explanation by demonstrating a case that epileptic seizureclusters (50 times a day) was rapidly improved by ZEN Homoeopathy.

In addition, the author introduces the activities of homeopathic natural farming that she is working on, as safe, secure and delicious foods are indispensable for building the body base.

**KEYWORDS:** ZEN Homoeopathy, Inner Child, Trinity, Karma, Homoeopathic natural farming

## INTRODUCTION

When I resided in the U.K., I developed ulcerative colitis. A British homoeopath treated me that motivated me to learn about homoeopathy for 5 years and I became a professional homoeopath there.

I had been practicing homoeopathy for about 8 years in the U.K., but many Japanese clients started to visit me there from Japan that made me think to return to my country. That was about 22 years ago. I established the first homoeopathic college in Japan and produced approx. 1,000 professional homoeopaths. As of today, approx. 1,500,000 people are using homoeopathic home kit that is harmless to the body.

Besides, I found many people suffer from atopic eczema or allergy due to excessive use of agricultural chemicals and chemical fertilizers, I became a farmer of my own accord in order to provide safe, secured and healthy food.

## ZEN Homoeopathy

I would like to explain about the reason for birth of ZEN Homoeopathy. After all, it was due to a Japanese state. Japanese people used to be a very devout nation from ancient times, however, many of them lost faith after the war and became individualist. As if this change made them be happy, but the fact was the opposite. They are bound by many morals and suppress their emotions, saying 'I should not cry' 'I should not get angry' etc. As a result, or not, they lost self-esteem, have strong sense of self-denial and became very passive. As being persuaded, they use agricultural chemicals or vaccines that affect them and are being worn out. I think this is the current state of Japanese people. Therefore, even they were cured by homoeopathic remedies, it was merely temporary and I saw many recurrent cases.

Hahnemann himself stated that diseases are cured only after patients are approached from various directions such as a lifestyle, a way of thinking and dietary habit, etc. Hahnemann advocated 'Heilkunst' who treat humans in an integrated manner [1], not 'Homoeopath' who treat humans with homoeopathy only. He also stated '*... for even the most masterly management of the case with the remedies that are the most exquisite and the best adapted to the bodily ailment will avail nothing, nothing at all, with a chronic patient thus exposed to continual sorrow and vexation, and in whom the vital economy is being destroyed by continuous assaults on the mind.*' in his writing 'Chronic Diseases' [2].

In order to learn from Hahnemann and continue to develop his teachings to match modern people, I am teaching a skill, called 'Inner Child Healing' that everyone can save their mental issues by themselves because I am wishing even patients who are exposed to continual sorrow and vexation to be also cured instead of saying 'avail nothing' like Hahnemann did.

Inner Child means 'suppressed emotions', 'unsolved emotions' and 'chronic diseases in mind'.

If we suppress a strong emotion, it sinks into the subconscious and continues to exist as a weak emotion.

For the details, please refer to English translation of my books and DVDs. [3]

Humans are an existence of a trinity (body, mind and soul)

[Table 1] Health state of body, mind and soul

ZEN Homoeopathy is a way of treating humans as a trinity.

Humans are an existence of the trinity (soul, mind and body), thus diseases exist in levels of soul, mind and body respectively.

ZEN Homoeopathy means a combination of homoeopathic three-dimensional treatments and three-dimensional treatments other than homoeopathy.

#### ■ Three-dimensional treatment in homoeopathy (ZEN method)

Treatment of soul... a treatment of chronic miasm using anti-psoric remedies

Treatment of mind... a treatment by a main homoeopathic remedy (stress remedy) that is led from a whole picture of a patient.

Treatment of body supporting organs by combinations of mother tinctures, homoeopathic tissue salt remedies and homoeopathic remedies that have affinities to the organ. In addition to this, detoxing treatment by tautopathic remedies that are related to iatrogenic diseases, food-related diseases and environment-related diseases. \*ZEN method is essential to treat chronic diseases.

#### ■ Three-dimensional treatments other than homoeopathy

- Treatment of soul ...releasing worldly sense of value by healing Inner Child. Study of spirituality. Faith

- Treatment of mind ... releasing suppressed emotions by healing Inner Child.

- Treatment of body ...guiding a life style that does not intake unnatural matters. Herbal treatment.

Food treatment (vegetables that are grown with natural farming).

In this way, ZEN Homoeopathy includes Inner Child Healing, spirituality development and food guidance in addition to art of homoeopathy.

ZEN Homoeopathy treats Body, Mind and Soul as a trinity

	Homoeopathic three dimensional treatment - ZEN method	Other three dimensional treatment
Soul (Daytime)	Treatment to give awareness by nosode remedies, etc that have the same value as the client	- Releasing worldly values by healing Inner Child - Spirituality - Faith, Karma
Mind (Evening)	Stress treatment by main remedy (stress remedy) that is led by Totality	Recommending Releasing emotions by healing Inner Child
Body (Morning) + (At any time)	Organ support by herbal tinctures (mother tincture) and potentized mineral remedies (Tissue salts) Detoxing treatment by homoeopathic remedies made from conventional drugs, food additives, harmful substances in environment	- Lifestyle guidance (avoid intaking unnatural substances) - Natural herbal medicines - Dietary therapy (vegetables grown with Natural Farming)

[Table 2] ZEN Homoeopathy

Homoeopathic ZEN method itself increases curative rate dramatically, it gives further increase when it is combined with Inner Child Healing and spiritual development.

Hahnemann also stated 'One single remedy is insufficient to heal secondary Psoric symptoms' in his 'Chronic Diseases'. [2]

#### Case study

It is a case of epilepsy.

I never met this patient directly and did not know about her medical background at all.

Accidentally, I found a staff who worked for my company was crying and worrying for her niece who had epileptic seizure for 50 times a day and was immediately hospitalized. Although I did not know about her medical background, I formulated a combination remedy as I wanted to help somehow.

I have found some causations of developing epilepsy through my 30 years clinical experience.

One of them is high levels of heavy metals. The worst is high level of lead. Others are high level of mercury and aluminium. If heavy metals such as lead, mercury and aluminium enter into a body, it

A peer-reviewed International Online EJournal

ISSN 0974 - 9799

<http://journal.sukulhomeopathy.com>

causes a lack of calcium that triggers convulsive seizure.

Another cause of epilepsy can be a bad flow of Kundalinin energy, so to speak, gods and Buddha's energy. I also found there is often a relation between epilepsy and karmic problem.

In Japanese writing, a word 'Nerves' means 'A path of god'. Nerves also represent 'Qi (energy)'. 'Qi' and 'Prāṇa' exist in various parts of the body and influence there.

That is why a treatment of invisible 'Qi' or 'Prāṇa' becomes the most important.

Humans are an existence of the trinity (soul, mind and body), thus triune treatment is required.

Diseases also relate to karmic issues. In this patient's case, she accepted to receive a karma of her ancestor who controlled people and forced them to work, thus she developed epilepsy.

As she was hospitalized, I could not prescribe various kinds of remedies, so I made a combination of various remedies and mother tinctures in one bottle.

Mother tinctures of Valeriana, Avena-sativa, Hypericum, Ginkgo-biloba and Ukon are very effective on nervous system.

As she was prescribed anti-epileptic drugs at the hospital, unification of her soul, mind and body was gradually collapsed. I prescribed Thuja mother tincture to treat this problem.

First of all, I dealt with heavy metals that cause epilepsy, then, supported minerals that became insufficient due to epilepsy. I also prescribed remedies for convulsion. Arsenicum album is for dealing with Kundalini and karma. I also added a remedy made from my chanting sound.

Heavy metals cause a problem in thyroid gland and parathyroid gland. If parathyroid gland is not functioning well, the body cannot produce calcium. In order to produce calcium, a remedy 'Sol' is required. Besides, she is carrying a karmic problem, she needs to be connected with gods and Buddha. As she is still little, I asked her parents to chant Heart Sutra and Shinto prayer every day for her.

#### [Report from the patient's mother]

My daughter was hospitalised urgently due to a series of epilepsy and was given high dose of

conventional drugs since 17 May. As you sent me DVD of Heart Sutra and Shinto prayer, we chanted them every day. Delivery of your 'Support Epilepsy' was followed and since our daughter started to take it, she could fall in sleep at 8.30pm and did not wake until 5am for the first time after she was hospitalised, although she had not been able to sleep at all.

All the members of my family were so impressed by Support Epilepsy. I also think our chanting is working well.

She was discharged from the hospital TWO days earlier than expected! It's a miracle! We are so grateful to you. Thank you very much.

--- End of Report ---

I could finally have the first face-to-face consultation one month after the above incident. Please refer to the dialogue of the consultation as it shown below.

#### [1<sup>st</sup> consultation]

[TY (Torako Yui)] You had a lot of troubles.

[CM (Client's Mother)] Yes, indeed.

[TY] You had a lack of sleep as she always cried and had epilepsy.

[CM] Yes, I did when she was hospitalized. Thanks to you, she can sleep very well now.

I am so grateful as she is not having a sleeping disorder at the moment. Thank you very much.

[TY] Her sleeping disorder became O.K. now?

[CM] Yes.

[TY] It is understandable that she couldn't sleep as she kept crying and had epileptic seizures for 50 times.

[CM] That's right. Can I change a nappy? She often wets her pants.

[TY] I assume that she has wee for many times.

[CM] Exactly. She can't control herself at all. She has to change her clothes every 5 or 10 minutes a day.

[TY] Is her urine volume large?

[CM] Very large

[CM] Everything became so bad since she became unwell in the process of a drug withdrawal.

Since a recurrence of the process of a drug withdrawal in last March, she fell in a real unusual condition as the 11 days passed.

# CLINICAL And EXPERIMENTAL HOMEOPATHY

A peer-reviewed International Online EJournal

ISSN 0974 - 9799

<http://journal.sukulhomeopathy.com>

[CF (Client's Father)] She couldn't drink, eat and sleep at all.

[CM] I was so amazed to see a 2 years old girl was under such a state.

[TY] She must have had a tough time. She is haunted by 30 ascetics, 40 departed souls that couldn't attain Buddhahood, 10 serpent-worships, 5 hermits and 90 preta (hungry ghosts). As she is haunted by preta, she never satisfies with eating. She must eat a lot.

[CF] She never satisfies. She keeps eating.

[CM] She is really suffering.

[TY] It won't stop until she is exorcised. Was it a difficult delivery when you delivered her?

[CM] I chose a painless labor, so anesthesia was injected while she was in my womb.

[TY] If anesthesia is taken into the body, the person gets stupefied and others' conscious can easily enter. Where did she have nevus of Ota?

[CM] Here

[TY] Her forehead was treated, right?

[CM] Her forehead and eyelids were treated by laser beams.

[TY] Nevus of Ota means she has karma.

When did she develop epilepsy?

[CM] She was 1 year and 2 months old.

[TY] In which situation?

[CM] She was around 1 year old when she had the first febrile convolution. I thought she just caught cold with a runny nose. Then, I brought her to a hospital and gave her the prescribed medicine.

[TY] Was it an antipyretic?

[CM] No, it wasn't because the fever was not high enough.

[TY] Still, she developed the febrile convolution.

[CF] Febrile convolution recurred at 1 year and 2 months years old. We called an ambulance and went to Red Cross Medical Centre. They gave her suppository called 'DIAPP', but it didn't stop her convolution at all.

[TY] Was she inoculated any vaccines just before she developed the febrile convolution at 1 year old?

[CM] Yes, she was.

[TY] She developed the febrile convolution one or two weeks after that, right? I think that is very doubtful.

[CM] She was prescribed antiepileptic drug called 'Topina', 'Keprra' and 'Mystan' when she was discharged from the hospital.

[TY] How much did she take?

[CF] It was incredibly a lot. She was given the amount that she couldn't take anymore.

[TY] Then, she had epileptic fits for 50 times. Was she around 3 years old when she was re-hospitalized?

[CM] That's right. She was always prescribed sleeping pills.

We were also suggested to drill a hole in her head to prevent from having an epileptic fit.

[CF] We nearly...

[CM] ...did that. We almost did that.

[TY] She managed to be discharged somehow the dosage was reduced.

[CM] That's right.

[TY] I prescribed 'Support Epilepsy' for her.

[CM] It was just before she was discharged.

The big difference was she became able to sleep very well. She didn't sleep at all and was awake until early morning by the day before she took it.

[TY] Right, she became able to sleep after she took 'Support Epilepsy'. That's the point.

[CM] I thought this point was totally different.

[TY] Is it still continued? Can she sleep?

[CM] Yes, it is continued.

[TY] I was told that the reason why she developed epilepsy was a gap in her spirituality. She must have much higher spirituality. Then, she has a karma. She is seeking forgiveness for her ancestors. Another reason could be a harmful effect of laser treatment. That most likely promoted it. I tell you why. Here is pineal gland that we can feel light. Evils can enter from here. I quite concern if the laser treatment was done near the pineal gland. Vaccinations can be also a trigger. Besides, bad effects on her could affect. As the pineal gland that is the source of identity is damaged, she tends to develop depersonalization, thus souls that are seeking for a physical body can easily enter her. They are evils. Furthermore, anaesthesia from painless labour also damaged her. All the elements has to be considered to cure her.  
... Can she make eye contact?

[CM] Yes, she can. I think this is a little different point. Her eyes are stable. She couldn't make eye contact last year, looking upward. She was not calm like now. I found such a big different after she took 'Support Epilepsy' from having taken different

<http://journal.sukulhomeopathy.com>

remedies in the past. Our sense of being guarded is something what I never felt before.

... Oh, she approaches to Torako sensei.

[TY] (talking to the client) Welcome. Bye-bye. Good bye. Let's shake hands. I'm glad to see you. You do that. I see.

[CM] I thought an evil haunted her last night. She didn't go to bed at a regular time. I wondered why, touching her body and found she had lumpy urticaria. After I chanted Heart Sutra, she fell sleep shortly. I thought she was haunted by a snake as it was so nubby.

[TY] Like scales?

[CF] Yes, they were.

[TY] She has been haunted by 10 serpent-worships.

[CM] She finally come to me to ask a cuddle, after she took 'Support Epilepsy'.

When I told her 'Come here', she never came to me last year. Even she did, she came from behind. I felt she didn't want to be looked her face.

[TY] Which shape does he have when she has a convulsive fit? Is it rigorousness like this way?

[CM] Her hands are risen tightly. For example, like this.

<She shows a video that the client's parents recorded when she developed an epileptic fit>

- Narration by CM and CF -

This fit seems severer this time.

She looks suffering this time.

It's tough this time again.

Her eye is facing to the right. Slightly to the centre. Will she be released soon? Her stomach started to pump.

It is a big fit this time.

Hold on! Hold on!

It seems finishing soon. Look, her eye moves to the right.

She shed tears. It was tough, wasn't it?

She can breathe now. (The symptom) lasted 1 – 1.5 minutes or so.

She tried so hard! Well done her!

-End of the video-

[TY] Does she have conscious when she is called?

[CM] Not at all.

When it was the worst time, she had the fit for 50 times.

[CF] Every 4 or 5 minutes. I felt that was such tortures for her. She couldn't sleep even she wanted to do so.

However, it was changed thanks to start changing Norito prayers and Heart Sutra. My mind became so clear.

[TY] You regained motivation.

[CM] That's right.

[TY] That's good.

[CM] Thank you very much.

--- End of 1<sup>st</sup> consultation ---

As epileptic fits occurred 50 times a day, it was such a burden on her. Her parents also could not sleep at all. However, she was improved by Support Epilepsy and increased her spirituality by her parents chanting.

She still urinated and defecated involuntarily. She drank 4 litres of water a day. Her satiety centre was not functioning how much ever she ate.

I chose below rubrics.

1<sup>st</sup> time

2019/6/28

- 1 : 971# Epileptiform attacks: consciousness, without
- 2 : 802# Awareness, lack of (absence, unawareness)
- 3 : 1312# Muscles in general – Tension (rigidity, tightness, turgidity)
- 4 : 1148# Twitching:
- 5 : 2080# Poisoning – Narcotic medicines, from:
- 6 : 450# Urination – Involuntary (enuresis)
- 7 : 433# Evacuation, acrid (corrosive, excoriating): involuntary
- 8 : 211# Saliva – increased:
- 9 : 1904# Eating, before (on an empty stomach, fasting): - satiety (fullness) to, from

The result is as it shown below.

<http://journal.sukulhomeopathy.com>

I chose Arsenicum-album on the 7<sup>th</sup> and Natrum-muriaticum on the 4<sup>th</sup> from the repertorisation result.

I also prescribed mother tinctures,Avena-sativa, Ginko-biloba and Hypericum to support the brain and added a remedy made from DPT that triggered the febrile convulsion. I chose a combination remedy of LED for harmful effect of laser beams. Sol and Phosphorus are also good. Carbo animalis is good for burn. I prescribed such remedies that caused the problem.

Natrum muriaticum in the morning is for loss of body fluid.

I chose Melatonin, Pineal-gland and Pituitary gland for afternoon.

She could not feel full even she ate a lot because her brain nerves were damaged by the laser treatment and her satiety center was not functioning. She also urinated involuntarily because the pituitary gland was damaged. The reason why I prescribed Melatonin was because she could not sleep. I think her pineal gland was damaged directly. Arsenicum-album works well for karmic problem and Kundalini symptom.

[A report from the client's mother]

Since I met Dr.Torako, our daily pray has become more meaningful and my motivation has increased more.

I could remember my passion and good point that I had forgotten because the reality was too painful.

As I became able to accept my weakness and bad points, I feel I am mentally stable. Thanks to this, my daughter is also well-adjusted.

This entire miracle happened because our soul's whole heartedly trembled with joy by touching your warmth, strength and deep affection from your

every single word on that day. Dear Dr.Torako, we deeply appreciate you.

- End of the report -

Let's see the second consultation.

## [2<sup>nd</sup> consultation]

[TY] What happened after she took my prescription?

[CM] 3 months passed after that. A big change was dominance of her appetite as if pretas (hungry ghosts) have gone.

[TY] That's good.

[CM] Her appetite greatly decreased.

[TY] She kept eating, right?

[CM] That's right.

[TY] I am glad to hear that.

She kept eating all the time.

[CM] Our concern was she used to intake too much water like 3 litres a day and kept wetting herself.

[TY] You kept changing her nappy.

[CM] Thanks to you, she is now settling with 500 – 700ml a day.

[TY] That's very good. It reduces load on the kidneys at once.

[CM] Yes, indeed. The amount of urination has decreased. She had blood examination at a University Hospital around this July. The result showed that she didn't have any disorders in the kidneys and the liver. I am so grateful.

[CF] She started to show her smile. She was just laughing just a few minutes ago.

[CM] Time of having blank expression has almost disappeared. She used to be blank all the time.

< The parents showed a video that recorded the client's smile>

She became able to have eye contact.

[TY] Yes, she did. She's improved a lot.

[CM] That's right. She says something like 'I want to go out' and can mimic little by little.

[TY] I see. She has become childish, right?

[CM] Yes, she has become childish and adorable.

[TY] I see. That's very good.

[CM] She is just fine and in a good mood. She used to look sufferings, cry, keep chewing a towel or sink down to the floor. Such problems were solved. She is more active and tries to move her body widely.

[TY] How about her epilepsy?

[CM] No recurrence.

[TY] That's wonderful.

Indexed in:

# CLINICAL And EXPERIMENTAL HOMEOPATHY

A peer-reviewed International Online EJournal

ISSN 0974 - 9799

<http://journal.sukulhomeopathy.com>

[CM] Thanks to you. She got angry because her father took only her younger sister out, although she also wanted to go out.

[TY] She can show such an emotion, too. She did not react like that way since she developed epilepsy.

[CM] We could not identify her.

[TY] I understand.

[CM] We really thought she was haunted by somebody.

[TY] I think she became childlike.

[CF] She likes having a run. She loves being chased. She also likes running round.

[TY] I am very grateful that your family support you and you are chanting Shinto prayer and Heart Sutra for her.

[CM] She can sleep at night and empty the bowels properly. It really goes smoothly.

[TY] I am glad to hear that.

[CM] I am so happy. There is no stagnation.

[CF] She developed mouth and foot disease.

[TY] That's good.

[CF] She had 39°C for two days.

[CM] I was so grateful for that.

[CF] Was it detoxification?

[TY] Yes.

[CF] I thought so.

[TY] It was good for her to have high fever.

[CF] Her feet, as well.

[TY] She developed 39 °C

[CF] She had 39°C fever for three days. She was playing without getting exhausted. I thought it was strange.

[CM] She did not recur epilepsy even she had 39°C This gave me a confident.

[TY] That's good. You understood that epilepsy wouldn't occur due to high fever. We should embrace fever or eczema.

[CM] I was very surprised.

[TY] The cause of epilepsy isn't due to fever. She still has plenty of salivation, doesn't she?

[CF] She salivates a lot.

[TY] Let her to do that. Please leave as it is.

Does she begin to watch TV a little?

[CM] Yes, she does. It seems she likes watching TV. She tries to dance in tempo with a song together with her younger sister.

[TY] She didn't do that at all.

[CM] That's right. She couldn't watch anything. Even TV was on; she could not do anything and

watch anything. Now, if she found her favourite music, she tries to do that.

Thanks to you, my family and I could have a hope and became in very good state. My view has been also changed. I would like to watch over.

[TY] Please keep working at this pace.

I am really happy to see her big improvement.

[CM] We are really grateful to you.

[TY] You are welcome. I look forward seeing you again.

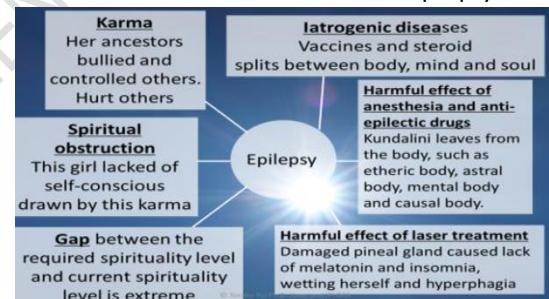

-End of the second consultation-

[Changes in this client]

2nd time

The below chart shows causations of epilepsy

It seems that her mother's ancestors from three generations earlier distressed people. The client's admirable soul accepted the karma. She attracts various unclean matters by bearing the karma. So to speak 'Spiritual obstructions'. Her self-conscious got faded.

Another issue was a spiritual gap between the level of required spirituality and her current spirituality. As the current spirituality was lower than the required one, her nervous system was damaged. Nervous is the path of god.

She also received vaccines and steroid that are chemicals to split body, mind and soul.

She had a harmful effect from laser treatment. Nevus of Ota was removed by laser

<http://journal.sukulhomeopathy.com>

treatment and damaged the pineal gland that is the most important third eye.

I also have to point out harmful effect of anaesthesia and antiepileptic drugs. Things like them make all of 'Qi', such as Etheric body, Astral body, mental body, Causal body and Kundalini unbalance.

## Conclusion

A single remedy cannot cover everything. Let's ask a support from gods and Buddha to save souls and enhance faith.

I encourage clients to chant Shinto prayer and Heart Sutra by themselves in order to purify karma. If the client is a child, I ask their parents to do that for them.

Inner Child healing is for saving mind.

The way of healing Inner Child is to recognise an emotion such as anger, sadness or fear that and give affectionate words to self. In addition to this work, prescribing plant or animal source homoeopathic remedies works well.

In order to save the body, prescribing tautopathic remedies (remedies that caused the symptom).

Tissue salt remedies are good to support lacked minerals.

In this client's case, I chose mother tinctures and sarcode remedies to support cerebral nerve as her cerebral nerve as an organ was damaged.

## Homoeopathic Natural Farming

We are also practicing Natural Farming that is applied to homoeopathic principles.

The above slide shows study of soybeans that did not bear fruits.

The causation was lack of phosphoric acid, so I gave a homoeopathic remedy, Phosphoric acidum 12X.

As a result, the harvest increased to 200kg from 133kg.

As cabbage requires Calcarea phosphorus to grow, I prescribed Calcarea phosphorus 12X.

Sunny lettuce contains Borax. After I prescribed Borax 30C, they grew so well.

When I gave Cicimifuga to deal with outbreak of aphid, they decreased dramatically within three days and disappeared within 5 days.

Please refer to the below weblink to watch activities of our company, Nippon TOYOUKE Natural Farming.

**Sixth sector industrialization by Nippon TOYOUKE Natural Farming**

<https://www.youtube.com/watch?v=UyVn2K49tjA>

That is all for my presentation. Thank you for listening.
