

Academic Board

The Principal of the Academy for Bioregulatory Medicine, Medical Doctor and the pioneer of the Bioregulatory Medicine; co-founder of the Biomedic Centre; the Chairman of the British Society for Bioregulatory Medicine; Editor of the British Homeopathic Formulary; international speaker, University lecturer, with expertise in chronic and degenerative conditions.

Dr Damir A Shakambet

Practising General Practitioner, who graduated at medical school in 1980, Dr Bretschneider also holds Diplomas in Acupuncture, Homeopathy, Homotoxicology and Naturopathy from China, Germany and UK; she has a particular interest in the Bioregulatory treatment of gynaecological and female endocrine disorders.

Dr Silvia Bretschneider

Dr Tatyana Telnikoff is a Medical Doctor with extensive experience in the field of Bioregulatory Medicine. She is a member of the Royal Society for Public Health, UK Society for Homotoxicology and the Association of Natural Medicine. Dr Telnikoff practices wholistic medicine, specialising in Aesthetic Mesotherapy.

Dr Tatyana Telnikoff

Family Doctor in a busy practice over many years, with extensive experience in the field of Bioregulatory Medicine. Dr Bourne is also an expert in Environmental Medicine and Bioresonance, and has a high success rate in treatment of multiple toxicities and allergic conditions.

Dr Stephen Bourne

Dr Laurence Bridot was trained as a Doctor of Pharmacy in France and she is also a Bioregulatory Medicine practitioner. Dr Bridot integrates various therapies such as Complex Homeopathy, Acupuncture, Mesotherapy and Bioresonance for her treatments and lectures in Aesthetic Medicine, Metabolic Balancing and Stress Management.

Dr Laurence Bridot

A Doctor in Medical Anthropology and a course director of the educational programme "Medicine Beyond Materialism", Dr Tobert published over 50 articles and two books, and has run workshops worldwide. Her special interests are biomedical, religious and spiritual strategies in relation to mental Health.

Dr Natalie Tobert

Dr Shangara Lal MBBS, PhD, comes from a conventional training in Medicine with broad clinical experience and a background in high level research. His major quest is redefining the balance between palliative and curative medicine through a bioregulatory approach that is, in many ways, contradictory to convention.

Dr Shangara Lal

A distinguished physician with an MBBS degree of Bachelor of Medicine and Surgery and MBA in Business Administration. Dr Sahi has spent years researching, practicing and teaching in the field of Quantum Medicine and Psychoneuroimmunology and specialises in integrative balancing modalities to accelerate physical cellular evolution.

Dr Sangeeta Sahi

Medical Doctor and Practitioner of Bioregulatory Medicine; co-founder of the Biomedic Centre; the Clinical Director of the Academy for Bioregulatory Medicine, The President of the British Society for Bioregulatory Medicine; Millenium Awards Fellowship, worldwide speaker and an expert in dysfunctional and psychosomatic conditions.

Dr Tatyana Bosh

There is a metered parking in front of the Centre, and 24 hours open NCP garage in Chiltern Street.

Academy for Bioregulatory Medicine

Bioregulatory Medicine

Postgraduate Diploma Course

Biomedic Foundation, registered medical charity in England and Wales, No. 1052731

Postgraduate Course in Bioregulatory Medicine

Biomedic Foundation is a registered educational charity that runs the **Academy for Bioregulatory Medicine**. The academy teaches several diploma and certificate courses throughout an academic year. The courses are intended for practitioners and doctors seeking proficiency in integrative holistic Healthcare, which spans from allopathic to complementary and alternative medicine. All courses are held at the **Biomedic Centre**, which is a pioneering clinic for applied Bioregulation.

Bioregulatory Medicine

Bioregulatory Medicine is an interdisciplinary therapeutic approach that **restores homeostasis by biological medical methodologies**. It puts the healing power of Nature back into clinical practice, as stated by Hippocrates's principle - "Vis Medicatrix Naturae".

Bioregulatory Medicine was formulated in the early nineties by Dr Damir Shakambet and Dr Tatyana Bosh to integrate healing wisdom with contemporary medical sciences. It presents the teaching of Dr S. Hahnemann, Dr H. Reckeweg, Dr. M. Gerson and other medical pioneers, within the context of Molecular Biology, Physiology, Psychology, Quantum Physics and Biological Open Systems Theory.

Bioregulatory Medicine offers an opportunity to **improve Health** by restoration of informational flow, cellular regeneration and detoxification of the biological terrain.

Diploma Course

The Course in Bioregulatory Medicine is a registered **Postgraduate Diploma Course** that attracts **CPD points**.

The course consists of seven weekends, within the academic year, teaching the theory and practice of Bioregulatory Medicine. Participants are provided with comprehensive study manuals, while lectures are interspersed with visual aids and clinical hours. Lecturers and clinical supervisors are Medical Doctors with expertise in integrative Bioregulatory therapies.

The course integrates Allopathic, Homeopathic, Naturopathic, Psychosomatic and Traditional Chinese Medicine within a concept of **Bioregulation**, respecting both disease-centred and Health-centred points of view. It also enables participants to prescribe homeopathic nanopharmaceuticals, a valuable addition to any practitioner, as an alternative or complement to pharmaceutical drugs.

The British Society for Bioregulatory Medicine

The course graduates are invited to become members and fellows of the **Society for Bioregulatory Medicine**, which is a fast growing network of like minded Healthcare practitioners. The Society provides an opportunity for continual professional research and development, as well as for clinical exchange and referral network.

Syllabus

Module I

Fundamentals of Bioregulatory Medicine

Principles of Bioregulatory Medicine
Biological System Theory and Homeostasis
Presomatic Syndrome and Psychosomatisation

Module II

Detoxifying Systems and Inflammation

Bioregulation of the Skin, Gastrointestinal, Hepatobiliary, Respiratory and Genitourinary Mucosal Systems
Bioregulation of the Inflammatory Conditions

Module III

Clinical Practice One

Bioregulatory Diagnostic and Treatment Protocols
Applied Bioregulation and Patients Management

Module IV

Informational Systems (PNEI) and Immunomodulation

Bioregulation of the Psychoneurologic, Immune and Endocrine Systems
Immunomodulation of Allergic and Autoimmune Conditions

Module V

Specialised Bioregulation

Disorders of Musculoskeletal and Connective Systems
Cardiovascular Pathology
Gynaecology and Obstetrics
Bioregulatory Ophthalmology

Module VI

Bioregulation of Degeneration and Dedifferentiation

Treatment of Degenerative Conditions
Bioregulatory Oncology

Module VII

Clinical Practice Two

Homeopathic Mesotherapy, Biopuncture and Biofacelift
Bioresonance Assessment and Treatment
Exam
